AICTE - EDUSKILLS VIRTUAL INTERNSHIP

Java Full Stack Development With Project

Internship Completion Presentation – 8 Weeks (April–June 2026)

Ravi Shankar Kumar

IILM University, Greater Noida

Grade: O – Outstanding

About the Internship Program

The “Java Full Stack Development With Project” Virtual Internship is an 8-week, industry-oriented program that combines self-paced learning with a hands-on capstone project, culminating in a certified, mentor-evaluated outcome.

8 Weeks

Program duration

**April–June
2026**

Internship window

Grade O

Outstanding rating
achieved

Program Partners

- Ministry of Education
- AICTE (All India Council for Technical Education)
- National Internship Portal
- EduSkills Academy
- IILM University, Greater Noida (host institution)

Objectives of the Internship

1

Gain practical, hands-on experience in Java-based full stack development

2

Apply front-end technologies (HTML, CSS, JavaScript) with back-end Java frameworks

3

Design and connect a database-driven web application using MySQL

4

Build and deploy REST APIs using Spring Boot following best practices

5

Develop a complete capstone project applying full stack concepts end to end

6

Strengthen debugging, version control, and documentation skills

Technologies & Tools Used

Language

Java (Core Java, OOP)

Back-end

Spring / Spring Boot, REST APIs, Spring Data JPA

Front-end

HTML5, CSS3, JavaScript

Database

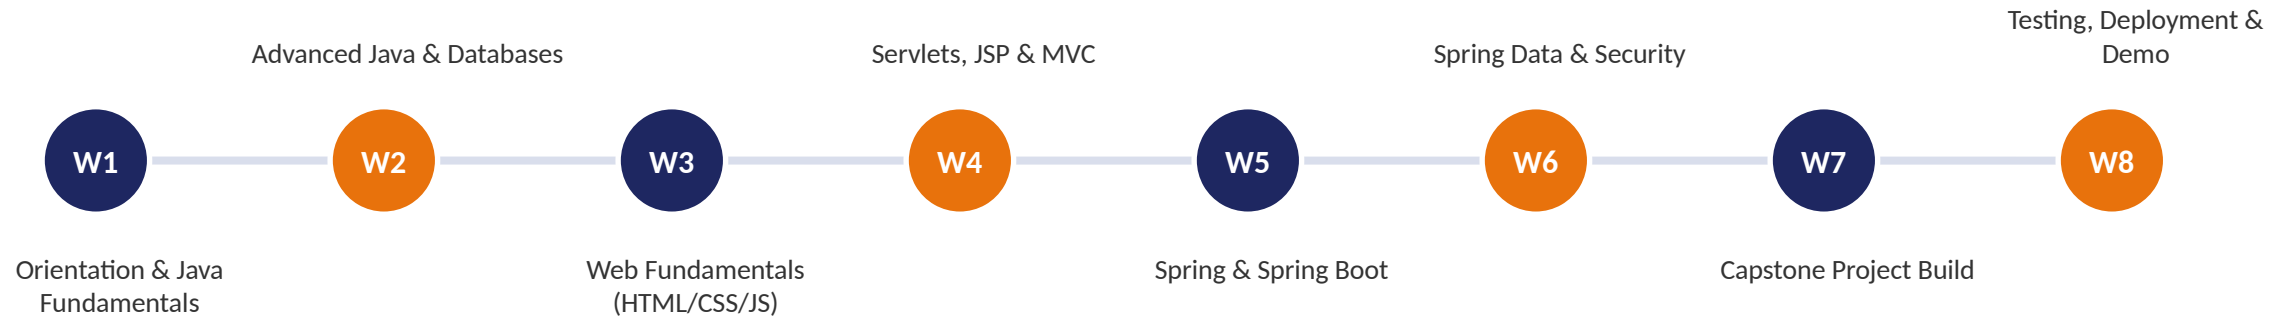

MySQL

Tools

Eclipse / IntelliJ, Postman, Git & GitHub, Maven

Week-wise Learning Journey

8-week progression from Java fundamentals to a full stack capstone project

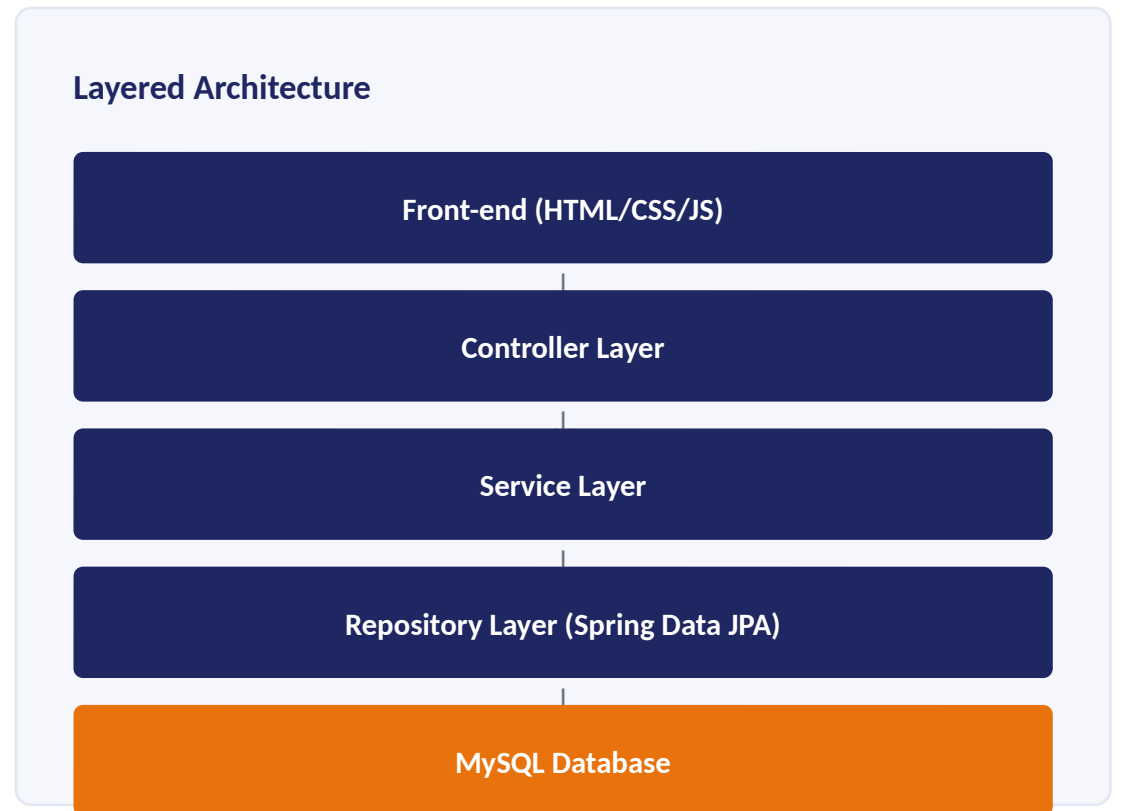

Capstone Project Overview

Project title/domain to be confirmed — shown below is the standard capstone structure used in this curriculum (edit to match your exact project).

A database-backed full stack web application: Java + Spring Boot REST APIs on the back end, MySQL for persistence, and an HTML/CSS/JavaScript front end performing full CRUD operations.

- Responsive front-end UI (HTML/CSS/JS)
- RESTful APIs built with Spring Boot
- MySQL persistence via Spring Data JPA
- Validation & structured exception handling
- Layered architecture (Controller→Service→Repository)

Key Learning Outcomes

1

Strengthened Core Java & OOP fundamentals

2

Built REST APIs using Spring Boot

3

Designed & queried relational databases
(MySQL)

4

Developed responsive front-end pages

5

Improved debugging & Git/GitHub workflow

6

Real-world, industry-style project experience

Successfully Completed

Java Full Stack Development With Project — Virtual Internship

Grade O

Outstanding (90–100)
